Planning (Project Plan)

Project Identification

Project Name:

Gym Membership & Class Booking System

Current Problem:

- 1- The crowd when entering and exiting
- 2- Difficulty booking classes over the phone
- 3- And the lack of an electronic system to track attendance and trainers
- 4- Not following the gym's rules and instructions

Description about project:

- An integrated electronic system that lets members browse and book training sessions (body building , Yoga , Crossfit, etc.), renew memberships online, and easily keep track of trainers' schedules and subscription statuses without any mistakes.

System Request

System Request—Gym Membership & Class Booking System	
Project Sponsor:	Ahmed
Business Need:	1- Using the website instead of relying on papers. 2- Improving the quality of devices and increasing them. 3- Make browsing easier and error-free. 4- Make the site available all the time.
Business Requirements:	1- Update system. 2- Provide on-line access. 3- Managing the trainers' schedule and work hours.. 4- Sponsored ads.
Business Value:	1- improving our health. 2- Saving time. 3- Saving cost. 4- Customer data accuracy.
Special Issues or Constraints:	1- class capacity limit. 2- Expired subscription restriction .

Feasibility Analysis

Technical Feasibility

1. We need to design it using Css or java script or html
2. We need some applications also to make it like visual studio
3. We need to make it work online when you are connected to the internet
4. We need to make this website to work on an specialized operating system like windows or android

Economic Feasibility

1. The benefit of this project will be acceptable
2. The loss in this project comes from some devices getting damaged.
3. All you need to get into the gym is to pay the subscription.
4. The cost of the developing will not be many

Organizational Feasibility

Organizational Feasibility Analysis includes the assessment of:

1. Management prowess: what is the ability of the initial management team?
2. Resource sufficiency: what nonfinancial resources such as human resources (management, trainers), facilities/location, equipment, etc. are required?

Time Estimation

	Planning	Analysis	Design	Implementation
Standard percentages	15%	20%	35%	30%
Estimated time based on planning time	Actual: 11 days	16 days	25 days	22 days

Tasks Identification

Name of Task	System Request
Start Date	6/10/2026
End Date	10/10/2026
Person assigned to task	Ammar ,Ahmed, Abdelrahman
Priority	High
Resources Needed	Microsoft word ,Excel
Estimated Time	4 hours
Actual Time	2hours

Name of Task	Feasibility Study
Start Date	6/10/2026
End Date	10/10/2026
Person assigned to task	Ammar ,Ahmed, Abdelrahman
Priority	High
Resources Needed	Microsoft word
Estimated Time	8 hours
Actual Time	5 hours
